About me

My passion is the creation of apps that improve people's lives. To do this, I try to grow not only in the technical aspect, but also in the user research and usability fields.

Making good apps is not only making them efficient and performant, they must also respond to a user's need and do so by providing a good experience.

Honors & Awards

2009 BEEST award CEyD Valencia

The BEEST (Banco de Estudios Estratégicos) is a project promoted by the City Council, through the CEyD (Centro de Estrategias y Desarrollo), in collaboration with the University of Valencia, the Polytechnic University of Valencia, the Cardenal Herrera-CEU University and the Catholic University of Valencia "San Vicente Mártir", which has as objective to stimulate the consideration of the city of Valencia as an object of study and thus strengthen relations between the city and the university world, supporting young researchers who want to deepen their knowledge about Valencia or any of its strategic objectives. Winner project: Study of an multimodal transport information system for the city of Valencia
